

SYSTEM AND METHOD FOR UPGRADING SERVICE CLASS OF A
CONNECTION IN A WIRELESS NETWORK

5 ABSTRACT OF THE DISCLOSURE

A system and method for upgrading service class of a connection in a wireless network includes identifying a congested CoS in a sector of a wireless network. Bandwidth availability in the sector is determined at an enhanced CoS in relation to the congested CoS. A communications session is selected in the congested CoS for upgrading. The communications session is upgraded to the enhanced CoS.
